

1

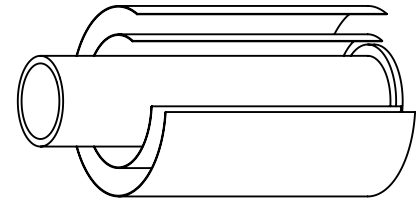

- Use template to mark lens
- Punch out 1" lens and screen disks.

2

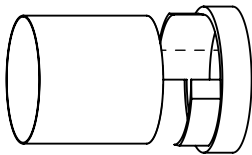

- Insert lens and screen disks into holder rings

3

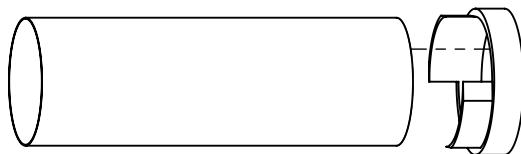

- Tightly wrap and tape a 3" x 3.75" card around the rolling fixture
- Loosely wrap and tape another 3" x 3.75" card around the previous one
- Slide card tubes off the fixture
- Tightly wrap and tape a 1" x 3.75" card around the fixture
- Slide this card tube off the fixture

4

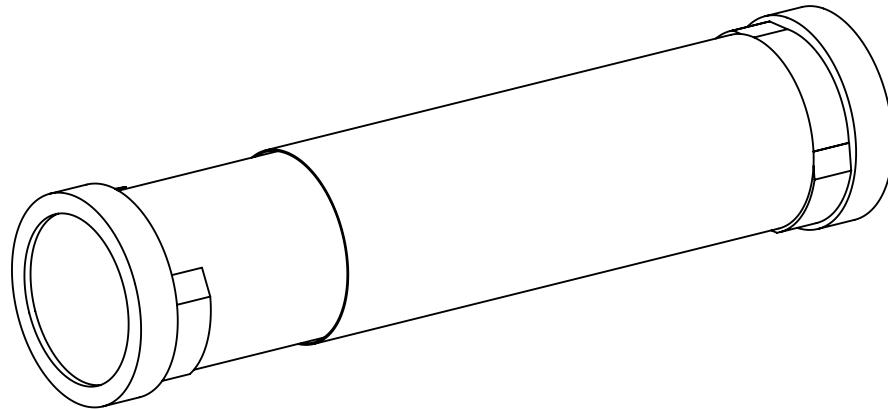

- Insert and tape the 1" length tube into the holder with the lens

- Insert and tape the smaller diameter 3" length tube into the holder with the screen.

5

- Couple the tube holder assemblies together using the larger diameter 3" length card tube
- Aim the lens at a brightly illuminated scene (WARNING: NEVER POINT AT THE SUN)
- Slide the tubes in and out to create a sharp focus (move the screen away from the lens for near objects and toward the lens for far objects)
